WORKING EXPERIENCE

MERN Stack developer Intern Imagecon India Private Limited

04/2023 - 04/2024

salem

Tasks

- I had learned new tools and technology to create a dynamic and responsive webpage.
- Strong understanding of responsive design principles to optimize webpages for desktop and mobile devices.

Software Trainee Imagecon India Private Limited

07/2024 - Present

Salem

Tasks

- To create a dynamic and responsive webpages and debug errors in both front end and back end part, responsibilities include creating efficient, testable code to meet specific requirements and ensure operational effectiveness.
- Write clean, efficient, and maintainable code based on best practices. Analyze and translate business needs into technical specifications.

PROJECTS

Employee Portal

- Employee portal webpage is made with help of Front-end as React-js framework, Back-end as Express-js and Database as MongoDB, it is based on pattern of modal view controller(MVC).
- The page include Signup, Login and Home page as per webpage layout. we can access both signup and Employee details by using mongodb database. Here i can contribute to create static page of front end using reactjs framework.
- The main objective of project is became portable and easily add, delete, read and update datas. Here I can use Restapi to fetch data from front end with help of writing schema and various types of Npm packages like mongoose, express, axios, cors, and react-router-dom. To became an responsive here I can use bootstrap framework.

Resume Builder Application

- Resume Builder is static webpage created with the help of Html, Css and Bootstrap framework.
- The page include Navbar, Header, Section, Footer part as per webpage layout. Highlight of project is here I can implement option for styling resume template through javascript and more than 15 template designs are available with multicolor options.
- The main objective of project is to become responsive and portable with all type of device and we can create user friendly resumes for different type of job requirement.

E-Commerce Webpage

- The webpage is developed with user friendly and portable for all devices based on responsiveness functions and also I can use add to cart functionality. Here i can use carousel, modal, Tooltip, sidebar and also google icons to make page an attractive.
- Tab option from bootstrap framework will use to easily navigate from one option to other it reduce rendering time and improve performance of applications.
- It help for consumer to select their product easily and add to wishlist for remainder purpose.
